

## BLENDER

Select two shades of eye shadow. I generally use Mineral Eyeshadow, but the HD Powder Paints work well. I have even blended Powder Paints with Mineral Eyeshadow. Select one shade as the highlight and the other for the shadow.

Apply the highlight shade from the upper lash line all the way to your brow. Most likely, a very light application is best. Blend with a light touch.

Apply the darker shade over the light shade. Start at the upper lash line and continue to the crease. Blend slightly past the crease. Carefully blend the area where light and dark meet.

Try all of the combinations at my exclusive Virtual Makeup Studio
